Project Status report

Name:	Yash, Jay, Dinesh
Community & UN SDG(s):	Regional Centres of Expertise; SDG Main: Quality Education (4) , Other: 17, 12
MVP #	2
Sprint cycle dates:	Feb 24, 2025

Project Name	SustainHub
Blurb	We are building SustainHub, an interactive platform that maps and showcases SDG-related awards in Saskatchewan. Aligned with the **UN Sustainable Development Goals**, it enhances the accessibility, recognition, and collaboration for sustainability initiatives. Using **WordPress, Leaflet.js, and APIs**, our community-centered digital habitat provides a seamless way to explore awards, filter by SDGs, and engage in real-time—creating a **transparent and accessible space** for sustainable development recognition
For Week Ending	March 9, 2025
Project Status	Green
Status Description	The current project iteration is on track. The team has completed MVP 2 of the features proposed.

Activities—During the past sprint cycle

- MVP 2
    - SDG mapping feature
        - Make separate pages for each goals
        - render projects with better UI and visuals.
        - Improve Admin page to modify uploaded data
    - Filtering feature
        - Display Filter on the web page which will filter out the displayed data based on user requirement.
    - Map Feature
        - Create Map visual to show projects in specific areas.
        - Create a better UI
- Paper
    - As per the last scrum's feedback, we changed the approach for the paper.
    - Written table of contents based on our project(TechStack and features)
    - Improved to the new version included investigating the distribution of projects across various SDG focus areas, organization types, and geographic regions.
    - Identifying opportunities to enhance **project recognition systems** and foster collaboration

Project Issues

- Difficulty creating a custom Plugin and integration with WordPress

○ Debugging errors and code.

Project Changes

Paper- As per the last scrum's feedback, we changed the approach for the paper.
- Written table of contents based on our project(TechStack and features)
- Improved to the new version included investigating the distribution of projects across various SDG focus areas, organization types, and geographic regions.
- Identifying opportunities to enhance **project recognition systems** and foster collaboration

Activities—Planned for Next Week

○ Discussion on Combining Features
  ■ Combine or keep separate for error handling
○ User testing
  ■ Finding issues
  ■ Checking endpoints
  ■ Missing functionality
  ■ Catch errors
○ Focus on Paper
  As per the last scrum's feedback, we changed the approach for the paper.
  Written table of contents based on our project(TechStack and features)
  Improved to new version, included Investigating the distribution of projects across various SDG focus areas, organization types, and geographic regions.
  Identifying opportunities to enhance **project recognition systems** and foster collaboration

Reflection

Do you feel "on track"?
- The team is on track to have created MVP 2 for all the features described.

What progress do you particularly feel good (great) about?
- The proposed functionality has been accomplished for the project. Just need to combine..

What barriers (if any) do you feel is/are a current impediment to success?
- the barriers are listed below
- Combining both features
- we have to make our own customized plugin

What help (if any) do you require to move positively forward?
- Meeting with the RCE website updating team- we need to discuss some feature requirements with RCE.

What questions or concerns do you have (if any)?
  Maintenance/update of the website in future.
